Waste and Recycling One[®]

The SAP[®] Business One
Solution for the
Waste and Recycling Industry

Meeting the Efficiency Challenge

The challenges facing the waste management industry have never been greater. The pressure on businesses and local authorities to reduce waste and maximise re-use and recovery is growing relentlessly.

At the same time, waste management companies – large and small – are expected to find more and more innovative ways of meeting demanding customer targets within an increasingly stringent and complex regulatory environment.

Improving business efficiency is the key to success in this intensely competitive market – and that's where Waste and Recycling One® (WR One) can help.

A Unique Software Solution for the Waste and Recycling Industry

The combination of SAP® Business One and WR One is a unique software solution created specifically to meet the needs of Small and Mid-Size Businesses (SMBs) in the waste and recycling industry.

The add-on WR One is designed for use with SAP® Business One, the affordable, integrated business management application. WR One will give you a clear and unified view of your entire business across customer relationship management (CRM), waste and recycling operations and finance.

Building on the wide-ranging capabilities of the successful SAP Business One solution (figure 1), WR One

offers a suite of additional functionalities tailored to the requirements of the waste and recycling industry, e.g.

- full order management and scheduling
- comprehensive vehicle management
- container on-site management
- telematic interface
- weight process integration

Manage your entire business end-to-end across sales, customers, purchasing, inventory, operations, financials and HR functions, all in a single system.

Which means increased efficiency, reduced costs, and better use of assets – as well as better control over all aspects of your business.

You can see an overview of all functionalities in figure 2.

The Base: SAP Business One

- A single system to streamline your entire business
- Instant and complete business information
- Proven tools to help you accelerate growth

SAP Business One – Maximum Flexibility

The **core** of SAP Business One consists of finance, logistics, and CRM functionalities.

SAP functionality extensions for Business One are country specific requirements, Outlook integration, XL Reporter, etc.

Extensions from independent software companies

are vertical solutions, e.g. WR One, overall production, job-order costing, document management, and warehouse management.

Thanks to the extension concept, SAP Business One is highly flexible and at the same time easy to use and to administrate.

Waste and Recycling One – FEATURES					
Order Management & Scheduling	Vehicle & Container Management	Weighbridge	Fleet Integration	Forms and Reporting	Portal
